

Job Title: Software Developer

About Us:

GovHost is a leading provider of innovative public safety software and services designed to enhance the efficiency and effectiveness of government agencies. Our mission is to empower public safety professionals with cutting-edge technology solutions that improve community safety and operational performance.

Position Overview:

We are seeking a driven, self-motivated Software Developer to join our cloud product development team. The ideal candidate will have a strong foundation in software development, a willingness to learn, and an interest in building reliable, user-focused cloud applications. Having experience leveraging AI coding is required but must also have experience and acumen coding without AI. As a Software Developer, you will work alongside experienced developers, product managers, and quality assurance team members to develop, test, and enhance GovHost's public safety software. This is a junior-level position with opportunities for professional and technical growth.

Key Responsibilities:

- Develop, test, and maintain features for GovHost's cloud-based software products.
- Write clean, reliable, and maintainable code.
- Troubleshoot software defects and assist with resolving technical issues.
- Participate in code reviews and follow established development standards.
- Collaborate with developers, product managers, quality assurance, and other internal teams.
- Assist with application integrations, APIs, and database-related development.
- Create and maintain technical documentation.
- Participate in Agile development activities, including planning, estimation, and status updates.
- Learn new technologies and contribute to the continuous improvement of GovHost's products and development processes.

Qualifications:

- Bachelor's degree in Computer Science, Software Engineering, Information Technology, or a related field, or equivalent education and experience.
- 2-5 years of software development experience, including internships, academic projects, or professional experience.

- Understanding of software development principles and object-oriented programming.
- Familiarity with web application development, relational databases, and SQL.
- Familiarity with source control tools such as Git.
- Strong analytical, troubleshooting, and problem-solving skills.
- Ability to learn new technologies and work effectively in a collaborative environment.
- Strong written and verbal communication skills.
- Experience using Claude AI or other AI-assisted software development tools.
- Experience developing cloud-based applications is a plus but not required.
- Experience with public safety, law enforcement, corrections, or government software is a plus but not required.

What We Offer:

- Competitive salary and benefits package.
- Comprehensive health, dental, and vision insurance.
- Supportive and collaborative work environment.
- Opportunities for professional growth and development.
- The opportunity to develop technology that supports public safety professionals and the communities they serve.

To apply, qualified applicants should email their resume and cover letter to careers@govhost.com.
