

GovHost Cloud RMS

Built for Officers.
Designed for Efficiency.

Cloud RMS

GovHost's Cloud RMS is fully web-based and built to streamline case reporting for public safety agencies. It reduces time spent on documentation and NIBRS submission—so you can stay focused on the job, not the paperwork.

No clunky installs. No sluggish screens. Just a modern RMS that helps you move faster, stay compliant, and work smarter.

100% Web-Based

No software installs. Updates are instant and automatic.

CAD-Agnostic & Standalone

Works with any CAD—ideal for agencies using shared or external dispatch.

NIBRS-Ready from the Start

Real-time validation helps ensure compliance as you work.

Intuitive, Officer-Friendly Interface

Designed around real workflows. Easy to learn and use.

Reliable Deployment & Support

Up and running faster than on-premise systems—with ongoing training and human support.

Smart Case Reporting

Built-in feedback loop enables fast supervisor approvals and version tracking.

Key Features

- Case reports with state-specific forms such as Use-of-Force and Pursuit
- Built-in reporting with drill-down dashboards
- Evidence and crime scene management
- Chain-of-custody tracking
- Community engagement tools to help officers stay connected
- Case report feedback loop with version history for supervisor approvals
- NIBRS validation built directly into the reporting workflow
- Light and dark mode for comfort in any environment

Let's talk about what your team needs.

GovHost gives you practical tools and real support from people who take the time to understand your agency. With regional offices and a service-first approach, we're here when you need us.
